## About \$BUSHIDO

BUSHIDO token has been created as a response to an increasing amount of scams in crypto community known as “pump-and-dump” schemes - a fraud that involves attempts to boost the price of a cryptocurrency through lies or misleading statements.

We believe that such malicious practices greatly hurt the image of crypto world and in order to fight that trend we have created BUSHIDO.

Such name for the token has not been chosen by coincidence. Bushidō (“The way of the warrior”) is the code of honour and morals developed by the Japanese samurai; it is also a moral foundation of our community, where honour and integrity is valued highly.

The development team for BUSHIDO is focused on the long-term plan which is why tokenomics have been set so that holders are rewarded (3% of every transaction is returned to the investors in a form of \$BUSHIDO reflections).

As the project develops and gains more following, the development team for BUSHIDO plans to launch NFT game based on the history of the Japanese samurai. More details will be shared soon.

Get involved in the project, join our community and shape the future of BUSHIDO and entire crypto world.

## Tokenomics

Main focus of \$BUSHIDO is to reward long-term investors through reflections and fees high enough to discourage swing trading.

Buy/Sell tax consists of:

- 5% to locked liquidity on Pancakeswap.
- 3% to \$BUSHIDO holders as a reward for long-term holders.
- 3% to the marketing wallet used to spread the word about our project.
- 1% to the contract developer.

Aforementioned fees **cannot** be changed since they are hard-coded.

An anti-whale measure has been introduced - maximum wallet allowance is set to 2%.
